

## COMPANY PROFILE

### HISTORY

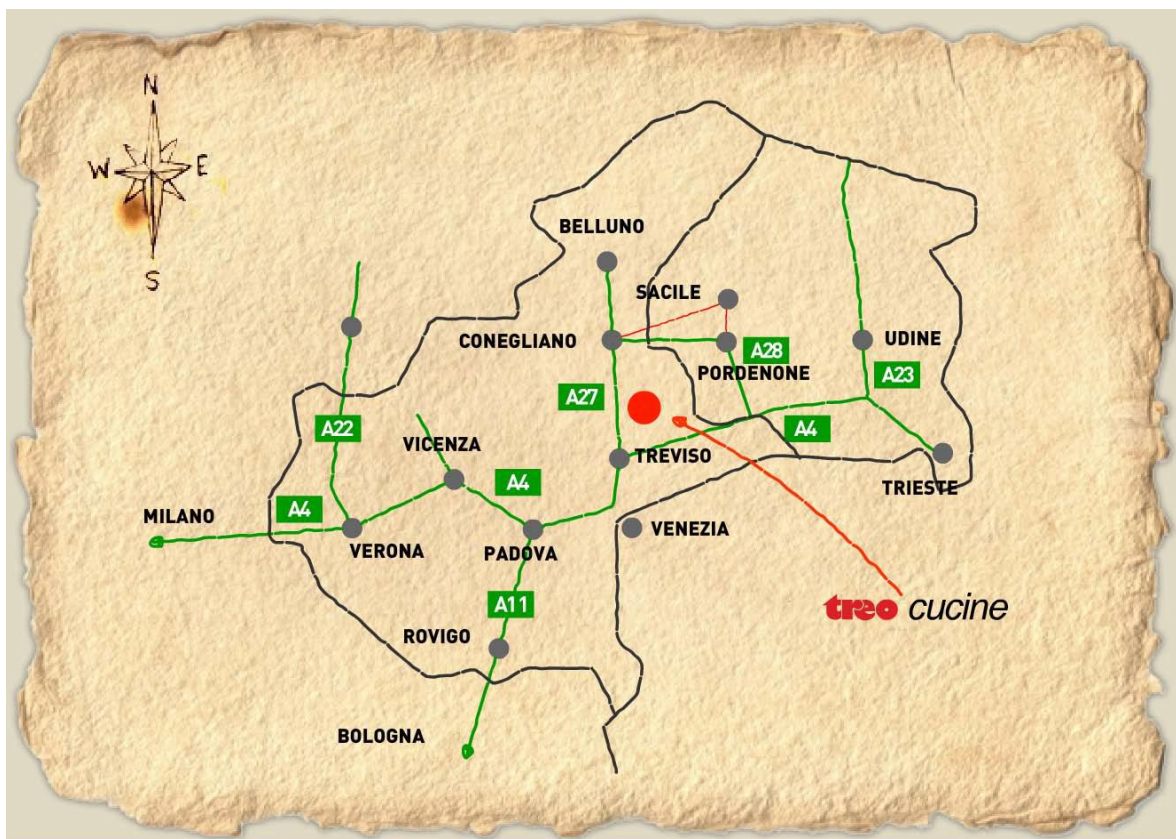

Our company started its activity as kitchens manufacturers in the seventies, in a small workshop. Today, it is a modern factory of 20,000 square meters.

During the years we didn't change our idea of passion and desire to create furniture that, today as yesterday, are made following a process of continuous improvement in technical development and choice of materials, without losing the art and the pleasure the craft.

## WHERE WE ARE

WE ARE AT ABOUT 1 HOUR FAR FROM VENICE.

## **PHILOSOPHY**

Within our production reality, the efficiency and accuracy of sophisticated automated machinery coexist harmoniously with the professionalism and the experience of our staff. Thanks to this company philosophy, we are now able to compete in the stimulating challenge to the achievement of the "overall quality".

With over then 40 years of experience we well understand the needs of style, functionality, beauty, quality and price of our clients. With this in mind, we are sure that our kitchens are the most appropriate response to customer expectations.

The range of products, from classic to contemporary style, is able to fully satisfy every kind of desire or request. It is this kind of experience that will allow us to keep our success as kitchens manufacturers with value and beauty unchanged over time.

## **MISSION**

## MAIN TECHNICAL FEATURES

- Water-repellent structures with low emission of formaldehyde.
- Water-repellent shelf, with pull out hook for greater safety.
- To choose a water-repellent structure means to meet strict requirements for use in a damp environment (as is the kitchen in some cases). Thanks to our ecological panels (constructed with completely recycled materials that do not require the felling of new trees), our products are solid and compact, non-deformable and durable.
- Total extraction “Grass” drawers and jumbo drawers with standard braking system (d.50 cm). Capacity of 40 kg, with reinforced bottom, tested for 100.00 openings. The easily-removable drawer front facilitates cleaning.
- Quick-coupling nickel-plated steel hinges (“Salice”) with 3 adjustable options. Hinges with standard braking system.
- Wall unit supports with adjusting screws for depth and vertical adjustments.
- Base units are supplied with H.12-15 adjustable PVC feet.
- Aluminium tray for sink unit bottoms.
- ABS or impact-resistant self-bearing bottom panels for refrigerators with ventilation grille.
- Base and tall units for oven with adjustable steel supports for oven.
- Wide modularity for every kind of kitchen project.
- Wide range of accessories for base, wall and tall units (pull out baskets, magic corner mechanism, cutlery trays, knife racks, spices racks, dish drainer racks, pans racks, bottles racks, waste bins, etc)
- Different kind of lights for wall units (led profile, aluminium rails with lights, halogen and led lights, lights with presence sensor, etc.)

## TREO IN THE WORLD

The Company exports the 35% of its production. An effective distribution network and a good organization, with the development of the Italian design products in line with the tastes and needs of different cultures, have allowed a growing success in international markets.

Treo is now able to ensure supplies for all types of residential complexes in the world.

It is not easy to have success in a complex sector as the **Contracts Sector**, but our resources and our commitment, and most important the belief to instill total confidence, allow us to well perform in our task. The quality of production and the efficient organization give to Treo the possibility to play a leading role also in the Contracts Sector.
